

CloudSec CLI Security Report

System Information

Hostname: Shonis-MacBook-Pro.local

User: shonishindhu

Scan Date: Tue Jul 14 20:25:00 IST 2026

Overall Security

Risk Score: 65 / 100

Risk Level: HIGH RISK

Compliance: 4 / 7 (57%)

Grade: F

System Health

Disk Usage: 7%

Memory Usage: 0%

Open Ports: 9

Linux Security

Failed Logins: 0

Firewall: ENABLED

Root Login: DISABLED

Password Policy: UNKNOWN

World Writable Files: 0

Inactive Users: 129

SSH Password Authentication: DISABLED

Docker

Docker: RUNNING

Running Containers: 0

Privileged Containers: 0

Root Containers: 0

Published Ports: 0

AWS

AWS: CONNECTED

Account: 806525742801

Running EC2: 0

Running RDS: 0

Elastic IPs: 0

NAT Gateways: 0

Kubernetes

Cluster: CONNECTED

Running Pods: 9

Privileged Pods: 1

Risk Distribution

System Health: 20

Linux: 5

Docker: 0

AWS: 0

Kubernetes: 25

Executive Summary

CloudSec detected a **HIGH RISK** environment.

Compliance Report

Firewall: PASS

Root Login: PASS

SSH Password Authentication: FAIL

Password Policy: FAIL

World Writable Files: PASS

Docker: PASS

Kubernetes: FAIL

Remediation

```
Privileged Kubernetes Pods
Severity: CRITICAL
Risk: Containers can escape normal security restrictions.
Fix:
```

```
kubectrl edit deployment
securityContext: privileged: false

Outdated Packages
Severity: HIGH
Install the latest security patches.
sudo apt update sudo apt upgrade
```
